Andrew 6:36 PM
Natalie Interesting ! Can we get it for holding type as well

Andrew 6:36 PM
@qbo Refine and only group by holding type

qbo 6:36 PM
What is the asset revenue by holding type?

Asset revenue by risk rating? | 

ASK IN NATURAL LANGUAGE

Connect Converse Collaborate.

Converse with your data

Ask data questions using **natural language**, and get answers in beautifully formatted charts and insights that speak the language of your **business**. Iteratively refine any query and empower decision makers to access and unlock the power of data.

Deep domain specific insights

Stop missing out on opportunities and insights to make a difference to your business. Let our advanced analytics and data science algorithms help you discover serendipitous insights on the most relevant metrics and segments that matter to your business.

FEATURES

Live Connect

Run in-database queries against your live data.

Logical Data Model

Organize your KPIs, metrics and data schemas that speak the language of your business.

Conversational

An intuitive natural language interface, because search is so last decade.

Collaboration

Data for the modern workplace, so you don't have to work in isolation.

Inbuilt Analytics

Insights at your fingertips to your most important questions.

SaaS, Cloud or On-Premise,

Tailored to suit your business.

Clients

About UNSCRAMBL

Unscrambl believes that the increasingly complex world of data can be simplified and transformed into actionable insights, saving valuable time and resources for every business. Unscrambl develops next-generation conversational analytics software that gives business users the power to access and consume data instantly and collaboratively. Unscrambl's A.I. powered data analyst 'QBO' combines the power of natural language and spontaneous collaboration to deliver on-demand insights to the decision-makers.

Unscrambl is headquartered in the United States and has offices in Singapore, Turkey, India, and the Philippines. For more information, please visit www.unscrambl.com
